Committed and goal-oriented computer science graduate looking to pursue a career in the software engineering domain. Ability to learn things quickly and capable of working in a fast-paced and team-driven environment.

## EDUCATION

### Bachelor of Computer Applications Gauhati University

07/2019 - 07/2023

Guwahati

### Full stack web development (MERN) Newton School

11/2022 - Present

Bangalore

## PERSONAL PROJECTS

### HTML, CSS & Js online Compiler. (02/2023 - 03/2023)

- **Technology Stack:** React.js, HTML, CSS, JavaScript.
- In this project, I harnessed the power of React.js to develop a user-friendly and intuitive online compiler that enables users to write, edit, and instantly visualize HTML, CSS, and JavaScript code. Leveraging my expertise in front-end development, I designed an interactive interface that provides a seamless coding experience. Users can input their code into designated text areas, and the application generates real-time previews, allowing them to witness the results of their coding efforts instantaneously. ### User-Friendly Movie Booking App - (05/2023 - 07/2023)

- **Technology Stack:** React, Firebase, Tailwind CSS.
- **Key Features Implemented:** **Authentication:** I integrated Firebase Authentication to enable secure user registration and login, ensuring that only authenticated users can access the booking features. **Movie Listings:** Users can view a comprehensive list of available movies, complete with essential details such as title, description, showtimes, and ratings. **CRUD Operations:** Utilizing Firebase Firestore, I empowered users with the ability to add, update, and delete movies and showtimes, ensuring that the app's content remains up-to-date and relevant. **Real-time Updates:** Leveraging Firebase's real-time database capabilities, users are instantly notified of changes to movie listings, showtimes, and their booking status. ### Netflix-2.0 (08/2023 - 08/2023)

- **Technology Stack:** React, Firebase, SCSS.
- Enthusiastic software developer passionate about creating immersive user experiences, I am thrilled to present my Netflix Clone project—a dynamic web application built using React, Firebase, and CSS styling techniques such as Flexbox and Grid. This project serves as a testament to my proficiency in front-end development and my dedication to delivering captivating digital experiences. [Live-Link](#) [Code-Link](#).

## SKILLS

DSA

JavaScript

React.js

Node

MongoDB

Express

Tailwind

Firebase

## CERTIFICATES

### FullStack Web Development (11/2022 - Present)

*This Full Stack Development course is industry-oriented and has been designed keeping in mind the needs of industry employers. Not only does this program impart core technical skills, but also provides a holistic view of the bigger picture through projects.*

## LANGUAGES

English  
*Professional Working  
Proficiency*

Hindi  
*Native or Bilingual Proficiency*

## INTERESTS

Web Development: I am deeply passionate about web development and the ever-evolving landscape of technologies that power the internet. Exploring modern front-end frameworks, back-end technologies, and creating responsive and user-friendly websites is a constant source of excitement for me.

Passionate about devouring and understanding documentation with keen interest.

Unique and Quirky: Don't hesitate to mention unique or less common interests. These can make you stand out and provide great conversation starters.
